Subject: HRI Technology

This fellow — John Kolojeski — reached out to us about a technology his company has developed that he believes could qualify as a heat rate improvement measure. He requested a meeting with Wheeler but understands that he really needs to meet with folks like you in the air office. He is not a member of ACCCE, but one of our members asked us to talk to him. I'm passing his request on to you to see if you or someone else might have time to meet with him next Thursday or Friday when he's in town.

Thanks,
Paul

Subject: Proposed ACE Rule
To: <wheeler.andrew@epa.gov>

The Honorable Andrew Wheeler
Administrator
U.S. Environmental Protection Agency
1200 Pennsylvania Avenue, N.W.
Washington, D.C. 20460

Dear Administrator Wheeler:

First of all, congratulations on your Senate confirmation as Administrator of EPA. I am familiar with your past service at the Agency and your fondness for it. I can understand it as a long time veteran myself, having first started at EPA in January 1972 a little over a year after it was founded. I began as a staff

attorney in OGC and left five years later as the Deputy Associate General Counsel and Chief of Litigation. I was fortunate enough to have worked closely with two of your predecessors, Bill Ruckelshaus and Russell Train, both outstanding Administrators and fine men. Over the years since then I have had the opportunity to contribute my services both to EPA as a consultant as well as on behalf of numerous corporate clients with interests before the Agency.

Secondly, more recently, on October 31, 2018, our company, Combustion & Emissions Technologies, L.L.C. (CET), through Counsel, submitted comments to the Agency in support of your legal authority to issue a new ACE Rule, a copy of which is attached hereto. Essentially, as set forth in that document, we have developed a patent protected technology that has been demonstrated "(T)o reduce greenhouse gas (GHG) emissions, increase operational efficiency, reduce carbon particulate matter (PM), NOx and SO3 and improve the quality of fly ash byproducts." Our scientists, in consultation with experts at EPRI and elsewhere, have prepared a comparison our product, CETALYST, with the Heat Rate Improvement Options set forth by EPA based on their relative costs and benefits. As you will see, our technology provides the EPA with a highly cost effective and environmentally beneficial option to reduce the Heat Rate in coal-burning EGUs.

We would like to present these data to you and your staff, if possible, on either May 2nd or 3rd at EPA headquarters to better assist in the decision making process. Please let me know if this would work for your office.

Sincerely,
John C Kolojeski

Justin

Are you able to participate? I'm trying to follow up with ALEC.

Thanks

Clint,

I just confirmed Allison Wood, Hunton attorney for UARG. Now I just need someone from EPA. I know this is short notice so appreciate you trying to find a back-up. If you strike out, let me know.

Again thanks,
Michelle

Clint,

Thanks for responding so quickly. Do you know of anyone else at EPA who is in town on Friday?

Michelle

Michelle,

Thanks again for the opportunity to participate. Unfortunately, I will be in Chicago until noon but I am planning to participate at the ALEC meeting during Friday afternoon's Energy TF meeting (where I plan to focus on ACE). Sorry for the trouble but perhaps the panel could focus on their perspectives and mention the EPA perspective coming that afternoon?

Clint –

You did such a good job at our board meeting, we'd like to see if you are available to speak this Friday at an ALEC meeting here in DC. The panel would be similar to the panel at our board meeting. I'm also reaching out to Peter Glaser to give an overview of the rule from a legal perspective. The panel is tentatively scheduled from 10:00 a.m. until 11:15 a.m. We'd like you to give an overview of the Rule similar to what you did at our board meeting.

I apologize for the short notice. One of our members asked us if we could help him put together the panel. If you can't speak, let me know who else at EPA could participate. I'll send you the details once I know you are available.

Thanks,
Michelle
